

Support wire guides through challenging anatomy with the catheter that has a crafted tip.

CrossCath®

SUPPORT CATHETER

Crafted Tip

CrossCath® features a tip design that transitions smoothly to the wire and is engineered to help cross lesions and minimize the risk of vessel trauma.

Excellent Pushability

The tapered shaft enhances pushability through tortuous anatomy and challenging lesions.

Low Profile

A distal end as small as 1.9 Fr allows access to smaller vasculature.

Enlarged view of the distal tip.

CrossCath[®]

SUPPORT CATHETER

CrossCath Support Catheters are single-lumen intravascular catheters designed to support a wire guide during access of vasculature, allow for the exchange of wire guides, and provide a conduit for the delivery of saline solutions or diagnostic contrast agents. CrossCath also has these features:

- Three highly radiopaque platinum-iridium markers that aid in estimating lengths within the vasculature.
- A hydrophilic coating on the distal end for smooth advancement.

Order Number	Reference Part Number	Proximal/Distal Fr	Accepts Wire Guide Diameter inch	Length cm	Tip Configuration
With Hydrophilic Coating on Distal 40 cm
