## ULTRASOUND NEEDLE

Used to sample targeted submucosal gastrointestinal lesions through the accessory channel of an ultrasound endoscope.

Supplied sterile and is disposable - intended for single use only.

- Echogenic needle tip provides ultimate visibility for increased accuracy
- Stylet extends the length of the sheath and needle tip to provide stability
- Adjustable locking handle allows for controlled and accurate needle length extension (0-8 cm)
- 10 ml vacuum-lock syringe maximizes tissue sampling with hands-free automatic aspiration (10 ml vacuum syringe is included)

Order Number	GPN	Sheath French Size	Sheath Length	Stylet Tip	Stylet Length	Needle Gage
EUSN-1	G22889	5.2- 4.5 Fr	140 cm	Beveled	140 cm	22
EUSN-3	G25492	5.2	140 cm	Ball Tip	140.2 cm	22

*Minimum accessory channel 2.0 mm.*
