

Take complete control of your PEG placement procedures.

Percutaneous Endoscopic Gastrostomy System

From the moment you open the Cook PEG kit, you'll notice the difference. The components are conveniently arranged in the sequential order in which they will be used, making the procedure flow as smoothly and efficiently as the nutrients you are delivering to your patients. The Cook PEG kit - available in push or pull methods - delivers the efficiency you need and the nutrients your patients need.

Percutaneous Endoscopic Gastrostomy System

Used for percutaneous endoscopic placement to provide enteral nutrition to patients requiring nutritional support.

Supplied sterile and is disposable – intended for single use only.

- Kit components, including hemostat and tube clamp, are conveniently packaged for sequential use during the procedure for increased efficiency
- Clear feeding tube – made of flexible, high-grade medical silicone – is optimal length to give physician control throughout placement
- Sharper scissors provide for a better cut during the placement procedure
- Reference “X mark” to specify where to cut
