

Place fully covered stents with complete confidence.

Evolution[®] Esophageal

CONTROLLED-RELEASE STENT - FULLY COVERED

The more control you have during stenting procedures, the better your outcomes can be. That's the simple concept behind Cook Medical's Evolution Controlled-Release stents. Every action you apply to the trigger-based handle causes a precise reaction, allowing you to deploy and recapture the stent with unprecedented control. Fully-covered with silicone, this stent is designed to enhance treatment of malignant esophageal strictures and TE fistulas. The fully covered Evolution stent is yet another addition to Cook's full line of innovative endoscopic accessories designed to meet all your patients' needs.

Evolution® Esophageal

CONTROLLED-RELEASE STENT - FULLY COVERED

Used to maintain patency of malignant esophageal strictures and/or to seal tracheoesophageal fistulas.

Supplied sterile and is disposable - intended for single use only.

- Silicone-encased stent reduces tumor ingrowth and food impaction
- Silicone coating throughout the length of each stent is designed to enhance treatment of malignant esophageal TE fistulas
- Dual lasso loops for proximal and distal stent repositioning immediately after placement
- Proximal and distal flanges reduce the risk of stent migration
- Proportional length of stent deployed or recaptured with each trigger squeeze for precise placement
