

Choose the only SFA stent with a proven drug effect.

Zilver® PTX® DRUG-ELUTING PERIPHERAL STENT

**Next-
Generation
Durable Design**

Fracture Rate of
0.9%¹

Established Technology

Zilver® PTX® is based on the next-generation Zilver Flex stent platform, which is known for its balance of flexibility, fracture resistance, and radial force. The combination of drug-elution and a strong yet flexible scaffold is the new standard of care for SFA lesions.

Superior Results

A randomised trial demonstrated the clear drug effect of Zilver PTX. At three years, Zilver PTX achieved a 79.6% patency rate, compared with 56.3% for provisional bare-metal stents.¹

Longer-Lasting Treatment

Zilver PTX provides sustained effectiveness. With Zilver PTX, you can achieve longer-lasting outcomes that are superior to the outcomes achieved by bare-metal stents.

1. Dake M. The Zilver PTX randomized trial of paclitaxel-eluting stents for femoropopliteal disease: 3-year results. Presented at: Vascular Interventional Advances (VIVA) 2012; October 9-12, 2012; Las Vegas, Nevada.
